

VIOLENCE RISK SUMMARY TEMPLATE

The risk summary aims to explain why violence risk is occurring for the consumer at the time of the presentation. The purpose is to integrate and explain previously identified violence risk factors (not to simply re-state them). No new information should be introduced in the summary.

Some overlap may exist between the various components of the risk summary. Remember, the aim is not to get each piece of information in the 'right' box, the main aim is simply to provide prompts to help ensure you capture all the relevant information.
